Description : Request for Expression of Interest for Supply And Development Of automated System For Collecting Data Within Project (financial Management And Accounting) Description : - Automated system for collecting data within Project (financial management and accounting)"software (hereinafter System) is widely distributed commercial software with local support that can be adapted to the tasks of the World Bank and requirements of Ukrainian legislation by creating additional reports, known as Financial Management Reports(FMR), to already existing in the System. In addition, additional functionality would be provided generation of Statement of Expense (SOE) and Summary Sheets (SS). For this purpose the following items would be provided: a) Standard software will store certain additional data(category, source of payment, etc.) that is not normally used for standard accounting; b) Adaptation of standard software for generation of new reports (FMR) using additional data to present information in the right form; c) Creation of screen forms and tables to allow users to change reports in certain extend and enter/change additional data such as change of financing interest under project implementation or management of SOE preparation. During adaptation of the System for the needs of CPMU the following three key concepts will be used: 1. Data structure for each sub-project (including CPMU) will be developed on the basis of the System to separately display various activities under the Project for reporting to the World Bank and another authorities (if necessary). Quantity of projects would not be limited (2, 3 or more). The System will be able to generate reports for the whole project(including data from all sub-projects) and separately for each sub-project (if necessary). 2. Training of CPMU financial management and procurement's specialists to use the System frequently. 3. One year of support for the System, if necessary, in changes or modifications of report forms or, if necessary, to add new report forms, primary documents and other reports and System properties. Tender notice No : IBRD/RDP/III/CS/CQS/18-2018

Description : Expression of Interest for Description of Services for Preparation of Detailed Design Documentation for Tourism Infrastructure Development at Bakuriani Recreation Park in Borjomi Municipality. MDF programs envisage implementation of various projects including the Third Regional Development Project financed by the World Bank Group and the Government of Georgia (GoG). The aim of the project is to promote tourism development in Mtskheta-Mtianeti and Samtskhe-Javakheti Regions. The present assignment requires Preparation of Detailed Design Documentation for Tourism Infrastructure Development at Bakuriani Recreation Park in Borjomi Municipality. The objective of the assignment is to develop a concept and detailed design documentation for rehabilitation of Central Park in Bakuriani. This will support the development of sustainable tourism infrastructure of Bakuriani Recreational Park and improve social-economic conditions in the region. The determining scope for the assignment has to be referenced from Bakuriani recreational territory land use master plan and its definite permissive zoning accompanied by the rules on use of the territories and regulation of buildup, spatial-territorial information system (procured by the Ministry of Economy and Sustainable Development of Georgia). Within the scope of this assignment, the Consultant is expected to develop at least three alternative concepts for the project design and justify the selection of the preferred proposed one, also in relation to the urban context surrounding the Park. After discussion with key stakeholders and final approval of the final concept design by MDF, conduct pre-design studies and detailed designs. During the preparation of the alternative design concepts and detailed documentation, the Consultant is expected to describe how the Park functionally relate to the surrounding areas of the town, with particular focus on accesses, parking areas, connectivity with other recreational facilities in Bakuriani (during different seasons and type of activities). With regard to the Park, the Consultant will offer solutions for active and passive leisure with the optimal layout for the walking paths and the resting places, including for those with disabilities. The amount of the new paths should be minimized, preferably arranged using natural materials (small pebble, pieces of tree membrane etc.). Interventions in the existing terrain should be minimized to the extent possible. Scale of the landscape environment should be taken into consideration. Proposed construction materials should be resistant to climatic conditions, should be energy efficient, meet the requirements of landscape architecture and have minimum maintenance costs.
